
Affordable Alzheimer's/ Dementia Care

Let the dollars make sense!

Your Mother and Father worked too hard.....to see their life savings go to a nursing home! That doesn't make any sense. Glen-Park "East" Retirement Community offers Affordable Alzheimer's Care/Dementia Care,..... the New Residential Alternative to nursing home care, Alzheimer's Care. Which makes Perfect sense. Why?

Since 1968....

Glen-Park Retirement Communities has been providing quality care for residents who require various levels of assistance with the activities of daily living. Located centrally, in the wonderful, quiet, residential, park-like setting in the beautiful and convenient city of Glendale California. The Glendale Galleria is located one mile west of Glen-Park. We provide outdoor excursions throughout Los Angeles. There's always something to do; with an emphasis on continued independence.

Independence....

of the individual resident is emphasized,... while at the same time providing as much assistance as needed to keep them remaining healthy and active. Activities (social groups, walking, outing's, entertainment etc.) which encourage continued social functioning are emphasized. Personal Care is approached from the standpoint of helping residents hold on to their independence for as long as possible.

Lifestyle Options

Safety and Security....

Were our primary concerns when designing Glen-Park East. Located in a quiet residential neighborhood in Glendale, next to Palmer Park. Glen-Park East is single-story, with no steps, gated with alarmed exits, video cameras, and trained staff. Families leave here with a clear conscience, knowing their loved ones are in a safe, c, secure environment. **Safe Care.....**

is what we call our unique approach to Alzheimer's/dementia care. It combines Activities (social groups, walking, ect.) Which encourage continued social functioning with Personal Care which encourages continued independence in activities of daily living (dressing, bathing, etc.) specializing in care for individuals with: Various Dementia's, Alzheimer's Disease, Parkinson's Disease, Post-stroke,....all individuals that require very close care. It is a combination of Supportive Care and higher staffing levels for a better "One on One" supervision. The dignity of the person is not compromised and normalization is emphasized.

Vacation Plan for Caregivers.....

is what we call our respite care program. It's when care givers go away on vacation and leave the caring to us. We have the staff, the accommodations and the services to make Mom's / Dad's stay enjoyable and meaningful.

Our Goal.....

Is to support the independence of the person while providing as much assistance as needed to keep them healthy.

Coordinated Care.....

Is our approach to care that adds 3 to 5 years to a typical resident's stay. We coordinate our personal care with other's medical care so as to maximize early intervention. Residents age in place better because we bring medical services to

them rather than moving them from place to place.

Ancillary Services.....

Offered include Home Health Nursing, Rehabilitation, Pharmacy, Medical Equipment, Psychological Services ect.. At our weekly Coordinated Care Meeting we assess residents' needs and coordinate care.

Six Levels of Care

Level 1 - Alzheimer's/Dementia Care

Resident requires constant redirecting to increased socialization.

Level 2 - Alzheimer's/Dementia Care Incontinence Management

Resident requires assistance with bladder and/or bowl incontinence.

Level 3 - Hospice

Resident is terminally ill and under the auspices of a licensed hospice agency.

Level 4 - Wheelchair Management

Resident requires assistance with wheelchair use.

Level 5 - Ambulation Management

Resident requests 1 on 1 ambulation four times a week.

Level 6 - Companion Care

One-on-One personal care and supervision.
